- A Capital Program of \$8,155,000 is proposed for 2021; A draw of \$3,149,500 from the UWSS Reserves would be needed to fund the 2021 Capital Program.
- Projected total UWSS Reserves for January 1, 2021 are estimated at \$21,597,000

BACKGROUND:

Since the Transfer Order of January 2001, the Board is responsible for considering and approving an annual budget for the Union Water Supply System. The format of the budget is generally the same as that previously prepared for 2020.

This draft budget is being presented to the UWSS board for consideration and approval. The draft 2021 budget is outlined to provide details in regards to the following:

- Anticipated revenue for 2021 from wholesale of water to the partner municipalities;
- Anticipated operating expenditures for 2021 including estimated costs for operation of the system by the Ontario Clean Water Agency (OCWA), under its contract with UWSS;
- Proposed Capital Works program for 2021 for UWSS;
- Forecasted Operational Expenditures and Capital Works program for 2021-2025.

DISCUSSION:

The draft 2021 Budget documents have been prepared based on the discussions with the contracted operator, OCWA, in regards to operational budget, major maintenance needs, and existing operational issues that would require implementation of capital works to resolve. The Budget documents reflect the following:

- The operations and maintenance costs associated with the 5-Year Cost Plus Operations and Maintenance Agreement between UWSS and OCWA that came into effect on July 1, 2019;
- Capital Projects that were approved and initiated in previous years that are ongoing into 2021.

Details regarding the budget components are discussed below.

OPERATING EXPENDITURES

Expenditures for the Union Water Supply System (UWSS) include *Fixed Expenditures* such as the OCWA operations contract, administration, and debt service and *Programs and Studies* that are proposed for 2021 to identify cost effective improvements for the operation of the UWSS. The total projected expenditures for 2021 is budgeted at approximately at \$8,572,000.

REVENUE

Revenue for the budget process is mainly based on wholesale billings from the sale of potable water to the 4 municipal owners. A much smaller component of revenue is based on miscellaneous revenue such as investment income and sundry income. The total estimated revenue for 2021 is \$13,578,000

Wholesale Water Revenue Summary

Wholesale water revenue is based on annual water usage by the 4 owner municipalities and the wholesale water rates.

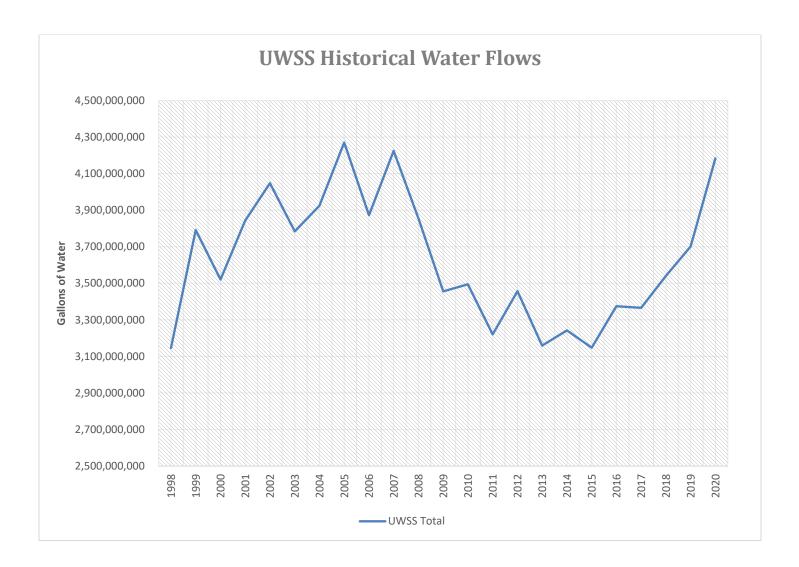

Water Usage

The projected water "usage" by municipal owners for 2021 is 19,477,000 m3 (4,284,940,000 imperial gallons), which is based on a 2% increase in water demand over 2020.

Wholesale Water Rates

For the 2021 budgeting process, it is proposed that an increase of \$0.0258 per cubic meter be applied to the UWSS wholesale rate. This would result in a 2021 UWSS wholesale rate of \$0.6716 per cubic meter to be applied as of January 1, 2021.

Based on the anticipated water demand of 19,477,000 m3 of potable water for 2021, the wholesale rate water revenue is estimated at:

Wholesale Rate Revenue Total:

Re: Draft 2021 UWSS Operations and Capital Budget

BUDGET SUMMARY

The proposed 2021 budget is summarized as follows:

Total Estimated Revenue: (includes wholesale rate revenue and miscellaneous revenue)	\$13,577,601
Total Estimated Operating Expenditures: (includes Operations Contract, UWSS Admin, Programs & Studies)	<u>(\$8,572,120)</u>
Revenue versus Operating Expenditures: Surplus/ (Deficit)	\$5,005,481
Capital Program: (includes Capital Purchases and Capital Works)	(\$8,155,000)
NET SURPLUS/ (DEFICIT): (Operating surplus/deficit less Capital Program)	(\$3,149,519)

The capital program for 2021 will be funded through the UWSS Reserves.

CASH /RESERVES VERSUS DEBT

Cash and Reserves for UWSS as of January 1, 2021 are forecasted to be approximately \$21,597,000 dollars. It should be noted that of the estimated \$21,597,000 in available cash and reserves for 2021, approximately \$10,785,000 are dedicated to UWSS Settlement Reserve, which is associated with the 2006 settlement that was reached regarding the MFP debt. Although the UWSS Board has authority to use these funds as it sees fit, the intent is to keep these funds in an interest bearing investment funds to offset the annual MFP Debt obligation and to function as a rate stabilizing Reserve Fund. These funds are currently invested in a GIC that will come to term in 2022 but are fully liquid and accessible if needed.

The 2021 Operating and Capital Budget projects a Net Deficit of \$3,149,519 for 2021 year end. Thus, it is anticipated that UWSS reserves at the end of 2021 will decrease to approximately \$18,725,000

Based on debt repayment schedules, the total UWSS long term debt balance for as of January 2021 is \$10,678,259 and consists solely of the Sunlife Loan (aka former MFP Debt) that has a term date of 2026. At the end of 2021, this debt will decrease to \$9,375,773.

e: Draft 2021 UWSS Operations and Capital Budget

PROPOSED 6-YEAR CAPITAL WORKS PLAN

The UWSS General Manager, with assistance and input from OCWA Operations Staff has developed a proposed 6-year Capital Works Plan (2021-2026) for the UWSS. This Plan reflects the UWSS Manager's intention to undertake upgrades and improvements to the UWSS to address lifecycle replacement/upgrade issues and to improve water treatment, storage and transmission efficiencies.

The Proposed 6-Year Capital Plan is included as Appendix B to this Report. The Plan identifies the proposed works for each year and the anticipated value of the works. The total proposed rate and Reserve funded capital works expenditures for 2021-2026 are projected at \$32,175,000. Proposed debt funded capital works for this period is valued at \$33,000,000 and include proposed Reservoir #3 (\$25,000,000) and upgrade of 12-inch watermain to Cottam (\$8,000,000).

CONCLUSIONS:

It is the UWSS General Manager's opinion that the Budget presented in this report provides a Budget for UWSS that is fiscally prudent while also providing for the major maintenance and lifecycle replacements needed to ensure that UWSS facilities and operations are effective and sustainable for the future.

Respectfully submitted,

R.R.
